

“Since completing a BSc degree in Physical Geography and Environmental Science, I have been fortunate enough to join the 2023 graduate scheme at J Murphy and Sons Ltd.

I am currently an Environmental Sustainability Graduate where I work within the Safety, Health, Environment and Sustainability function of the company and I am involved in a big project within the energy sector of the business.

Every day is different, and the project is continually evolving which gives me large scope to learn along the way. I also receive lots of training as part of the graduate programme to enhance my professional development at Murphy. It excites me to be involved in projects that will make a huge contribution to UK energy sector and beyond.”

- Lucy Mann, Environmental Sustainability Graduate, Murphy
